Kitazato Establishes Subsidiary in Europe to Enhance Market Understanding and Customer Support

Kitazato Corporation (“Kitazato”; TSE: 368A) announces that it has established Kitazato Europe, S.L.U. (“Kitazato Europe”), as its wholly-owned subsidiary, to enhance market understanding and customer support in Europe, after having carried out the relevant incorporation procedures.

Purpose of establishment

Europe is an important market for Kitazato and offers significant potential for further growth. Accordingly, Kitazato has been working to strengthen its understanding of local markets and customers, as well as customer support in Europe.

As part of these efforts, Kitazato has carried out the incorporation procedures of Kitazato Europe, and the local registration has now been completed.

Through the establishment of Kitazato Europe, Kitazato aims to deepen our understanding of the market and enhance our sales promotion and technical support capabilities, thereby expanding its business in the European market.

–END–

About Kitazato

Kitazato aims to help as many people as possible realize their hopes of parenthood, contributing to addressing the social challenge of declining birth rates and create social value for a sustainable future by confronting the challenges faced by people seeking fertility treatment and healthcare professionals and providing reliable technologies.

Kitazato specializes in assisted reproductive technologies, including artificial insemination, in vitro fertilization, cell cryopreservation, and regenerative medicine. To meet the global demand for reproductive medicine, Kitazato develops and manufactures products used in fertility treatment and

supplies them to approximately 110 countries and regions.

Kitazato is committed to “advancing reproductive medicine.” To fulfill this commitment, we collaborate with physicians and researchers around the world, leveraging our long-standing expertise and knowledge to improve existing technologies and develop new ones.
